

Protegent PRO

Protegent PRO has two components first one is Crash Proof, This software designed to keep the image of the file indexes/ disk properties and keeps updating them at regular intervals. Second one is Protegent Total Security, This software comes across with a unique and advanced firewall protection, securing computer from the advanced e-threats.

Crash Proof – “Data Loss Prevention Software”

Crash Proof is data loss prevention software which once installed revives 100% data in the event of a data loss situation.

The post-crash data recovery software has serious technical limitations in getting back 100% of the data. Only a partial recovery was possible in most cases. Moreover a non-technical end user was unable to handle the issues like connecting a disk or media on which transfer the recoverable files. The post crash recovery software sometimes also requires input about how data was lost or how it happened, and this is not what a non-technical user would know, wants to investigate, or would be willing to admit (How many users admit they did restart the PC without properly shutting it down? Who would ever open an attachment that was possibly infected with a virus?).

Another part of user psychology is that user only will search for data recovery software when user faces a problem and everyone around user are on their toes, like user’s staff, IT department, service provider and of course accounts department to shell out a lot of money for data recovery service or purchasing a post crash data recovery software. Moreover neither services or data recovery software guarantees 100% recovery.

The Problem:

- Partition / Boot sector corruption
- Directory structure / File run corruption
- File Allocation / Master File Table errors
- Viruses
- Accidental disk format
- Accidental file deletion
- Bad file transfer
- Faulty software
- Incorrect operation of certain disk management
- Utilities Voltage glitches

Solution:

Crash Proof - Data Loss Prevention Software

Scope of Work:

1. Revives the disk if the partition/boot sector is corrupted. You get messages like "Invalid drive Specification", "Invalid Media Type Error", "Missing Operating System".
2. Revives the disk if FDISK is accidentally run.
3. Revives the disk to original working state even if a drive is accidentally formatted.
4. Revives the disk/drive/partition if it goes missing.
5. Revives the disk if root folder is corrupted.
6. Revives the disk if there is a FAT error/mismatch.
7. Recovers deleted files.
8. Recovers data files if the operating system is not booting up.
9. Recovers data files that are lost because of folder corruption.
10. Recovers deleted files with original names. First character intact.

Features:

1. Guaranteed Recovery. Unistal assures 100% recovery if pre-installed.
2. Only software to recover fragmented files after accidental formatting or deletion.
3. Only software to bring back a formatted partition as it was before the crash.
4. Only software that brings back deleted files with their original name.
5. View and save the contents of drive as they were on any day of the week.
6. No technical expertise required as the recovery process is automated.
7. No need to take our hard disk to connect elsewhere.
8. Time required to revive is immediate and hence computer down time is reduced.

Protegent Total Security

Antivirus, Internet Security and total security are common words describing security software, but only for Internet threats. The new buzzword, Total Security Solution is on priority from the broader aspect of individual users and enterprise users. Total Security doesn't only mean protection from Internet Threats but also Protection from data loss!

The word "Protegent" is deciphered from protégée ("To Protect" – in French). Total Security is what is offered in Unistal's Protegent PRO. Protegent PRO encompasses internet threats and data safety through its two modules "Total Security, Crash Proof". Protegent Total security designed for countering Internet threats is simple to use yet a sophisticated protection for all kinds of spyware, malware, e-threats, root kit and Anti-Phishing. It's an enhanced vulnerability scanner (Inbuilt) has features for Resident Protection, E-mail Scanner, On- Demand Scanner, Virus Vault for safe handling of files and automatic hourly updates. Protegent total security boasts of the world biggest antivirus database engine .

Features :

Antivirus & Antispyware	Protegent protects your computer from all kinds of Viruses, Trojans, Spywares, Rootkits, Malwares. It helps you to keep your system clean and healthy.
Antispam	Anti spam feature blocks unwanted mails before it reaches your Inbox.
WI-Fi Management	WI-Fi management feature helps you to monitor your WI-Fi network. It gives an alert message whenever the other system connects to your WI-Fi network.
File Shredder	File Shredder permanently erases files and their traces from your system.
File Encryption	File encryption feature Locks up confidential files in an encrypted vault.
Tune-up	Removes unnecessary files and registry entries, for optimize performance
Autopilot Mode	Provides hassle free working by making optimal security decisions without your interruption.
Chat Encryption	Keeps your conversations private on Yahoo Messenger, MSN.
Laptop Mode	Minimizes power consumption while your laptops are running on battery by disabling auto scan and auto updates.
Gamer Mode	Game Mode temporarily modifies protection settings. It minimizes their impact on system performance
Setting Protection	Setting protection feature helps you to protect your settings with a password, So that no one can change or modify the settings even if the other user has the admin rights.
Active Virus Control	Active Virus Control continuously monitors the applications running on the computer. It looks for malware and other unethical objects.

Password Manger	The password Manager feature helps user to protect the settings with a password.
Duplicate File Finder	Duplicate file Finder feature helps you to detect and delete duplicate files from your system and save your hard disk space.
Registry Cleaner	Registry Cleaner option helps you to keep your registry clean. It helps you to remove the unwanted registry items.
Hourly update	Protegent total security software takes updates every hour and protects our system from new viruses.
Two Way Firewall	Two way firewall feature protects your computer from inbound and outbound unauthorized connection attempts.
Vulnerability Scanner	The vulnerability Scan feature helps you to keep your system updated. It monitors the critical windows updates, normal windows updates, application updates, weak password and media auto run updates.
Improves Search Advisor	It gives advances warning of risky websites from Google and Bing Search results.
Personal Data filter	Prevents critical data, such as your social security number, from leaving your computer
Antiphishing	Antiphishing feature blocks all the WebPages which are supporting viruses scams and personal data phishing attempts.
Silent Mode	Minimizes system interruptions during standard system processes.
Scan Dispatcher	Triggers system scans when resource usage falls below a certain threshold to avoid any impact on your system's performance
Rescue mode	Reboots your computer in a trusted environment, which is used for cleanup and restoration
Virtualized Browser	Isolates browser to a Bit defender-provided environment to block web based threats
Safe pay	Secure online transactions with the help of "Safe Pay"

System Requirements

Minimal system requirements

- Operating system: Microsoft Windows XP SP3 (32-bit), Vista (SP2), Windows 7 (SP1), Windows 8(SP1)
- Available free hard disk space: 1.8 GB
- CPU: 800MHz processor
- RAM: 1 GB

Recommended system requirements

- Operating system: Microsoft Windows XP SP3 (32-bit), Vista (SP2), Windows 7 (SP1), Windows 8(SP1)
- Available free hard disk space: 2.8 GB
- CPU: Intel CORE Duo (1.66 GHz) or equivalent processor

RAM

- 1 GB (Microsoft Windows XP)
- 1.5 GB (Microsoft Windows Vista, Windows 7 & Windows 8)

Software requirements

- Internet Explorer 7 and higher
- Yahoo Messenger 8.1 and higher
- Firefox 3.6 and higher
- Thunderbird 3.0.4
- Outlook 2007, 2010
- Outlook Express and Windows Mail on x86
